Assignment2 Report

1. Because synchronization tool helps me prevent race conditions when different threads are modifying the shared data and keep track of the number of passengers in the queue. In this program, there are multiple threads (taxis and airplanes) and a shared queue, thus synchronization tool is needed.
   If I do not use synchronization tools there will be a lot of race conditions, for example when there is only one passenger in the queue, two taxis are trying to dequeue, they might both pass the isEmpty check, then one of them might pick up a passenger from the past, as we are using an array to hold the value for the queue.

2. I run each scenario for 10 hours and the results are printed below.
   Click the hyperlinks to reach to the position
   Airplane:2   Taxi:100
   This one obvious has too many taxis, therefore most of them are waiting for passengers.
   Airplane:5   Taxi:10
   This one has a more balanced amount of taxis and airplanes, most of the passengers get to take taxi.
   Airplane:10   Taxi:2
   This one has too many airplanes, a majority of the passengers are not able to enter the queue.

3. Air planes might not arrive at the same top of the hour, since they are separate threads and we are not required to implement something to make the thread meet every hour.

grant@ubuntu:~/Documents/ECSE427/Assignment2$ ./air_taxi_sim 2 100

You entered: 2 airplanes per hour

You entered: 100 taxis

Creating airplane thread 0

Creating airplane thread 1

Airplane 0 arrives with 6 passengers

1000000 enqueued to queue

Passenger 1000000 of airplane 0 arrives to platform

1000001 enqueued to queue

Passenger 1000001 of airplane 0 arrives to platform

1000002 enqueued to queue

Passenger 1000002 of airplane 0 arrives to platform

1000003 enqueued to queue

Passenger 1000003 of airplane 0 arrives to platform

1000004 enqueued to queue

Passenger 1000004 of airplane 0 arrives to platform

1000005 enqueued to queue

Passenger 1000005 of airplane 0 arrives to platform

Airplane 1 arrives with 9 passengers

1001000 enqueued to queue

Passenger 1001000 of airplane 1 arrives to platform

1001001 enqueued to queue

Passenger 1001001 of airplane 1 arrives to platform

1001002 enqueued to queue

Passenger 1001002 of airplane 1 arrives to platform

1001003 enqueued to queue

Passenger 1001003 of airplane 1 arrives to platform

1001004 enqueued to queue

Passenger 1001004 of airplane 1 arrives to platform

1001005 enqueued to queue

Passenger 1001005 of airplane 1 arrives to platform

1001006 enqueued to queue

Passenger 1001006 of airplane 1 arrives to platform

1001007 enqueued to queue

Passenger 1001007 of airplane 1 arrives to platform

1001008 enqueued to queue

Passenger 1001008 of airplane 1 arrives to platform

Taxi driver 0 arrives

Taxi driver 0 picked up client 1000000 from the platform

Taxi driver 1 arrives

Taxi driver 1 picked up client 1000001 from the platform
